

Allowed

AI-Powered VA Certification. Simplified.

2,500

certification requests per semester. One spreadsheet.
Zero automation.

THE PROBLEM

The Current Workflow

1

Student requests

2

SCO runs query

3

Copy to Google Sheet

4

Work-study preps (stale)

5

PeopleSoft + EM

6

Manual copy units

7

Submit, repeat

Target: 20/day. Reality: rarely achieved.

All text dark on light background. *Manual workflows are error-prone and slow.*

What the Spreadsheet Really Does

Assignment Tracking

Log daily requests

Certification Status

Mark as processed

Safety Alerts

Ch.33 exhaustion

One spreadsheet doing three jobs. Manual color-coding. No automation.

Ch.33 exhaustion warnings are a SAFETY function — currently tracked by eye.

THE OPPORTUNITY

Market Numbers

5,000+

VA-Certifying
Institutions

1.5M+

Certifications
per Year

\$564M

Benefits Processed
(DGB, Month 1)

VA is automating THEIR side (50-62%). Universities are still 100% manual.

No one is doing this.

● **PeopleSoft** Data storage, not automation

● **Enrollment Manager** VA's tool, not the university's

● **Generic RPA** Doesn't understand VA rules

● **Financial Aid Tools** Wrong domain entirely

First mover advantage in a category that doesn't exist yet.

ALLOWED

The Solution

What AllowED Does

An AI workstation that replaces the entire SCO workflow

- Auto-pulls fresh enrollment + degree eval (no stale data)
- Decision tree evaluates every course against VA rules
- Clean students batch-certify. Exceptions surface for SCO.
- One click to approve and submit. Done.

AllowED assists. The SCO decides.

The AllowED Workflow

Student
requests

AllowedED
auto-
evaluates

SCO reviews
exceptions

Certified &
submitted

7 steps → 4. Manual copy → automated. *Stale data* → *real-time*.

Three Interfaces

SCO Workstation

Queue, certify, benefit alerts, PO tracking

Student Status Page

"Where's my GI Bill?" answered instantly

Admin Dashboard

Volume, performance, audit compliance

200+

regression checks. All passing.

THE PLAYBOOK

How Category Creators Win

Veeva

Niche compliance

80% pharma market share

Palantir

Build with the customer

\$20B government platform

TurboTax

Make the complex effortless

70% tax filing share

Stripe

Developer-first wedge

\$95B payments standard

AllowED follows the playbook: own the niche, prove it works, become the standard.

Go-to-Market: Phase by Phase

Phase 1

CSU System — SDSU + CSUN pilot, expand to 23 campuses

Phase 2

Large Veteran Schools — ASU (8,900 GI Bill), Texas A&M, UMGC

Phase 3

Community Colleges — Understaffed, high need, 1000+ campuses

Phase 4

National Standard — Banner + Workday SIS. Every VA-certifying school.

Sales Channels

Conferences & Community

NAVPA Annual Conference (Dallas 2026, 400+ institutions)

NASPA (2,000+ higher-ed leaders)

NASPA Military-Connected Students Symposium

Grants & Government

VA SBIR/STTR (\$150K-\$1.5M R&D grants)

CEVSS (Dept of Education, \$500K+ for veteran student tech)

VA OIT Industry Day (March 2026)

CSU System-level procurement

Why Now

- 1 VA staffing cuts (1,000+ in 2026) degrading approval speed
- 2 Digital GI Bill modernization creating expectation of speed
- 3 No competitor in the space — category is empty
- 4 Students waiting MONTHS for GI Bill payments
- 5 CSU deployed ChatGPT Edu system-wide — open to EdTech innovation

The gap between VA automation and university automation is growing every day.

Compliance Built In

Safety

- HITL escalation (7 triggers)
- No cert without SCO approval
- Full audit trail
- Census-date-aware logic

Compliance

- VA Handbook rules in code (38 CFR Part 21)
- Dual certification model
- Section 508 accessible
- FERPA-ready architecture

Built by an SCO. Validated against 200+ real-world checks.

PAULINA

Teacher. VA Compliance Consultant. SCO. Academic Advisor. Founder.

Certifies 2,500 students/semester at SDSU. Built AllowED from the real workflow —
not from imagination.

paulina0101@gmail.com

The Ask

Pilot Partners

SDSU + CSUN, Fall 2026

Strategic Investment

Scale to all 23 CSU campuses

VA Partnership

OIT Industry Day, SBIR/STTR

We didn't imagine the workflow. We automated the real one.

AllowED

Allowing education to flow.
